

KIDNEY CARE IN OREGON: HOUSE DISTRICT 57

Rep. Greg Smith

Kidney disease affects an estimated 37 million people in the United States, and approximately 90% of those with kidney disease don't know they have it. With support from elected officials and the community, we can reduce kidney disease diagnoses, improve patient outcomes and pioneer new research that will inform best practices and innovative treatment methods for future generations. All data below is reported at a county level. More information and links to data sources are available at NWKidneyCouncil.org.

Dialysis Footprint

4 Dialysis Centers

6 Nephrologists

260 ESRD Patients

End Stage Renal Disease (ESRD) is the 5th and final stage of CKD. Individuals with ESRD need dialysis or a kidney transplant to survive.

Prevalence of Chronic Kidney Disease (by county)

19% Gilliam

18% Umatilla

13% Morrow

18% Wasco

12% Sherman

12% Wheeler
